

### Walmart reports Q2 FY 16 EPS of \$1.08, updates guidance Walmart U.S. delivered 1.5% comps, and improved customer experience scores

- Q2 diluted EPS from continuing operations was \$1.08. Currency exchange rates negatively impacted EPS by approximately \$0.04.
- Comp sales at Walmart U.S. increased 1.5%, driven by traffic of 1.3%. Neighborhood Market comps increased approximately 7.3%, with strong growth from new stores. Customer experience scores improved over last year.
- Total revenue was \$120.2 billion. On a constant currency basis, total revenue was \$124.5 billion.
- E-commerce sales globally increased approximately 16% on a constant currency basis. Gross merchandise value, or GMV, increased approximately 18% on a constant currency basis.
- Q2 earnings were pressured by currency fluctuations, lower Walmart U.S. margins and investments in customer experience. Consolidated operating income declined 10%.
- Walmart updated full year EPS guidance to a range of \$4.40 to \$4.70, from a previous range of \$4.70 to \$5.05. This range includes Q3 EPS guidance of \$0.93 to \$1.05.

"We're pleased that the investments we've made are helping to improve our business. Even if it's not as fast as we would like, the fundamentals of serving our customers are consistently improving, and it's reflected in our comps and revenue growth. In this case, our desired changes require investments, which are pressuring earnings this year. We're confident that our strategic plan will create robust sustainable growth for shareholder returns over time."

Doug McMillon, President and CEO, Wal-Mart Stores, Inc.

(Amounts in billions, except as noted)

## Walmart : (Consolidated)

The company paid \$1.6 billion in dividends and repurchased approximately 14 million shares for \$1.0 billion.

Return on investment<sup>1</sup> (ROI) for the trailing 12-months ended July 31, 2015 was 16.2%, compared to 16.7% for the prior comparable period. The decline in ROI was primarily due to continued capital investments, as well as our decrease in operating income.

Free cash flow<sup>1</sup> was \$5.1 billion for the six months ended July 31, 2015, compared to \$6.8 billion in the prior year. The decrease in free cash flow was due to lower income from continuing operations and the timing of payments.

<sup>1</sup> See additional information at the end of this release regarding non-GAAP financial measures.

Consolidated membership and other income increased 13.9%, to \$899 million during the second quarter. Other income primarily benefited from the gain on the sale of bank operations in Mexico.

<sup>1</sup> 13-week period ended July 31, 2015, compared to 13-week period ended Aug. 1, 2014.

<sup>2</sup> See additional information at the end of this release regarding non-GAAP financial measures.

"We continue to invest in our business to enhance the customer experience. Operating profit will be pressured for the remainder of the year, due to continued investments in store associate wages and additional hours, as well as headwinds from pharmacy reimbursements and ongoing shrink, primarily in Walmart U.S. In addition to these pressures on Walmart U.S. gross margin, we continue to be impacted by currency exchange fluctuations. We now expect our fiscal 2016 earnings per share to range between \$4.40 and \$4.70, including a range of \$0.93 to \$1.05 for the third quarter. The updated full year range includes the assumptions detailed below."

Charles Holley, Executive Vice President and CFO, Wal-Mart Stores, Inc.

| EPS EPS<br>Q3 FY16 FY16 |                 | Walmart<br>U.S.<br>comp <sup>2</sup> | Sam's Club<br>comp<br>w/o fuel <sup>1,2</sup> |

| \$0.93 - \$1.05         | \$4.40 - \$4.70 | +1% to +2%                           | Flat to +2%                                   |
| LY: \$1.15              | LY: \$4.99      | LY: +0.5%                            | LY: +0.4%                                     |

#### Assumptions for fiscal 2016 earnings per share guidance

• The impact from investments in wages, training and additional hours in our stores and clubs will be approximately \$0.24, including approximately \$0.08 in the third quarter. Our decision to add associate store hours beyond our February plan is the primary driver.

3

- The incremental investment in Global eCommerce is expected to range between \$0.06 and \$0.09.
- Headwinds in our U.S. businesses from reduced pharmacy reimbursements rates, which are negatively impacting gross margins, and shifts in the mix of cash versus insurance transactions. Along with pharmacy headwinds, higher than expected ongoing shrink in Walmart U.S. will impact full year EPS by approximately \$0.11, including approximately \$0.03 in the third quarter.
- Full year currency exchange rate impact is expected to be approximately \$0.15, up \$0.02 from last quarter's revised guidance of \$0.13.
- The range for our effective tax rate of 32 to 34 percent remains unchanged from our previous guidance.

#### Accounting for certain leases

The company has been engaged in a review of the accounting treatment of leases. As part of this ongoing global review, we are assessing our historical application of Accounting Standards Codification ("ASC") 840, *Leases*, regarding lessee involvement in the construction of leased assets. In a number of our leases, payments we make for certain structural components included in the lessor's construction of the leased assets will result in the company being deemed the owner of the leased assets for accounting purposes. For example, the company, due to its scale in purchasing certain structural components for stores under development, for some leases, pays for HVAC systems for leased stores to lower the overall cost of the lease. As a result, regardless of the significance of the payments, ASC 840 defines those payments as automatic indicators of ownership and requires us to capitalize the lessor's total project cost on our balance sheet with a corresponding financing obligation. Generally, in these situations, the company has not accounted for the total project costs of the lessor as owned assets.

<sup>&</sup>lt;sup>1</sup> See additional information at the end of this release regarding non-GAAP financial measures.

<sup>&</sup>lt;sup>2</sup> 13-week period ending Oct. 30, 2015, compared to 13-week period ended Oct. 31, 2014

As our review and assessment is in process, as of the date of this release, we are unable to provide reasonable estimates of the amounts of any error corrections. However, the primary impact of any cumulative error corrections, which would be non-cash adjustments, could result in a material increase to our fixed assets and related lease financing obligations on our balance sheets. In addition, based on the nature of these errors, we would not expect that any cumulative error corrections would be material to our income statements, although rent expenses would be re-characterized to depreciation and interest expense. We also do not anticipate any change in the net increase or decrease in cash and cash equivalents in our cash flow statements.

4

The company is working diligently to complete this lease accounting review and assessment, which requires a lease-by-lease review, and for which an update regarding the nature and magnitude of any error corrections, as well as the assessment of the effectiveness of internal control over financial reporting in this area, will be provided not later than the date on which the company files its Form 10-Q for the quarterly period ended July 31, 2015.

Wal-Mart Stores, Inc. (NYSE: WMT) helps people around the world save money and live better - anytime and anywhere - in retail stores, online, and through their mobile devices. Each week, nearly 260 million customers and members visit our 11,532 stores under 72 banners in 28 countries and e-commerce websites in 11 countries. With fiscal year 2015 revenue of \$485.7 billion, Walmart employs approximately 2.2 million associates worldwide. Walmart continues to be a leader in sustainability, corporate philanthropy and employment opportunity. ###

#### Forward Looking Statements

This release contains statements as to Walmart management's guidance regarding the diluted earnings per share from continuing operations attributable to Walmart for the year ending Jan. 31, 2016 and the three months ending Oct. 31, 2015, the assumptions underlying such guidance described above under "Assumptions for fiscal 2016 earnings per share guidance," Walmart U.S.'s comparable store sales and Sam's Club's comparable club sales, excluding fuel, for the 13 weeks ending Oct. 30, 2015, and management's expectations that Walmart's strategic plan will create robust sustainable growth for shareholder returns over time and Walmart's operating profit will be pressured for the remainder of the year ending Jan. 31, 2016 due to certain investments and expense headwinds and the effect on Walmart's balance sheets, income statements and cash flow statements of Walmart's review of the accounting treatment of leases. Walmart believes such statements are "forward-looking statements" as defined in, and they are intended to enjoy the protection of the safe harbor for forward-looking statements provided by, the Private Securities Litigation Reform Act of 1995, as amended. Walmart's actual results may differ materially from the guidance provided and the underlying assumptions and management's expectations noted above as a result of changes in circumstances, assumptions not being realized or other risks, uncertainties and factors including:

- economic, geo-political, capital markets and business conditions, trends and events around the world and in the markets in which Walmart operates;
- currency exchange rate fluctuations, changes in market interest rates and commodity prices;
- unemployment levels;
- competitive pressures;
- inflation or deflation, generally and in particular product categories;
- consumer confidence, disposable income, credit availability, spending levels, shopping patterns, debt levels and demand for certain merchandise;
- consumer enrollment in health and drug insurance programs and such programs' reimbursement rates;
- the amount of Walmart's net sales denominated in the U.S. dollar and various foreign currencies;
- the financial performance of Walmart and each of its segments;
- factors affecting Walmart's effective tax rate, including assessments of certain tax contingencies, valuation allowances, changes in law, administrative audit outcomes, impact of discrete items and the mix of earnings between the U.S. and Walmart's international operations;
- customer traffic and average ticket in Walmart's stores and clubs and on its e-commerce websites;
- the mix of merchandise Walmart sells, the cost of goods it sells and the shrinkage it experiences;
- transportation, energy and utility costs and the selling prices of gasoline and diesel fuel;
- supply chain disruptions and disruptions in seasonal buying patterns;
- consumer acceptance of and response to Walmart's stores, clubs, e-commerce websites, mobile apps, initiatives, programs and merchandise offerings;
- the availability of attractive e-commerce acquisition opportunities;
- cyber security events affecting Walmart and related costs;
- developments in, outcomes of, and costs incurred in legal proceedings to which Walmart is a party;
- casualty and accident-related costs and insurance costs;
- the turnover in Walmart's workforce and labor costs, including healthcare and other benefit costs;
- changes in accounting estimates or judgments;
- changes in existing tax, labor and other laws and changes in tax rates, trade restrictions and tariff rates;
- the level of public assistance payments; and
- natural disasters, public health emergencies, civil disturbances, and terrorist attacks.

Such risks, uncertainties and factors also include the risks relating to Walmart's operations and financial performance discussed in Walmart's most recent annual report on Form 10-K filed with the SEC. You should read this release in conjunction with that annual report on Form 10-K and Walmart's quarterly reports on Form 10-Q and current reports on Form 8-K subsequently filed with the SEC. You should consider all of the risks, uncertainties and other factors identified above and in those SEC reports carefully when evaluating the forward-looking statements in this release. Walmart cannot assure you that the future results reflected in or implied by any such forward-looking statement will be realized or, even if substantially realized, will have the forecast or expected consequences and effects for or on Walmart's operations or financial performance. Such forward-looking statements are made as of the date of this release, and Walmart undertakes no obligation to update such statements to reflect subsequent events or circumstances.

Reconciliations of and Other Information Regarding Non-GAAP Financial Measures (Unaudited)

The following information provides reconciliations of certain non-GAAP financial measures presented in the press release to which this reconciliation is attached to the most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles (GAAP). The company has provided the non-GAAP financial information presented in the press release, which is not calculated or presented in accordance with GAAP, as information supplemental and in addition to the financial measures presented in the press release that are calculated and presented in accordance with GAAP. Such non-GAAP financial measures should not be considered superior to, as a substitute for or alternative to, and should be considered in conjunction with the GAAP financial measures presented in the press release. The non-GAAP financial measures in the press release may differ from similar measures used by other companies.

#### Calculation of Return on Investment and Return on Assets

Management believes return on investment (ROI) is a meaningful metric to share with investors because it helps investors assess how effectively Walmart is deploying its assets. Trends in ROI can fluctuate over time as management balances long-term potential strategic initiatives with possible short-term impacts.

ROI was 16.2 percent and 16.7 percent for the trailing 12 months ended July 31, 2015 and 2014, respectively. The decline in ROI was primarily due to continued capital investments, as well as our decrease in operating income.

We define ROI as adjusted operating income (operating income plus interest income, depreciation and amortization, and rent expense) for the trailing 12 months divided by average invested capital during that period. We consider average invested capital to be the average of our beginning and ending total assets, plus average accumulated depreciation and average amortization, less average accounts payable and average accrued liabilities for that period, plus a rent factor equal to the rent for the fiscal year or trailing 12 months multiplied by a factor of 8. When we have discontinued operations, we exclude the impact of the discontinued operations.

Our calculation of ROI is considered a non-GAAP financial measure because we calculate ROI using financial measures that exclude and include amounts that are included and excluded in the most directly comparable GAAP financial measure. For example, we exclude the impact of depreciation and amortization from our reported operating income in calculating the numerator of our calculation of ROI. In addition, we include a factor of 8 for rent expense that estimates the hypothetical capitalization of our operating leases. We consider return on assets (ROA) to be the financial measure computed in accordance with generally accepted accounting principles (GAAP) that is the most directly comparable financial measure to our calculation of ROI. ROI differs from ROA (which is consolidated income from continuing operations for the period divided by average total assets of continuing operations for the period divided by average total assets of continuing operations for the and adds interest income; adjusts total assets of continuing operations for the impact of accumulated depreciation and amortization, accounts payable and accrued liabilities; and incorporates a factor of rent to arrive at total invested capital.

Although ROI is a standard financial metric, numerous methods exist for calculating a company's ROI. As a result, the method used by management to calculate our ROI may differ from the methods used by other companies to calculate their ROI. We urge you to understand the methods used by other companies to calculate their ROI before comparing our ROI to that of such other companies. The calculation of ROI, along with a reconciliation to the calculation of ROA, the most comparable GAAP financial measure, is as follows:

<sup>1</sup> Before adjustments for lease accounting corrections. <sup>2</sup> The average is based on the addition of the account balance at the end of the current period to the account balance at the end of the prior period and dividing by 2.

#### **Free Cash Flow**

We define free cash flow as net cash provided by operating activities in a period minus payments for property and equipment made in that period. Free cash flow was \$5.1 billion and \$6.8 billion for the six months ended July 31, 2015 and 2014, respectively. The decrease in free cash flow was due to lower income from continuing operations and the timing of payments.

Free cash flow is considered a non-GAAP financial measure. Management believes, however, that free cash flow, which measures our ability to generate additional cash from our business operations, is an important financial measure for use in evaluating the company's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated income from continuing operations as a measure of our performance and net cash provided by operating activities as a measure of our liquidity.

Additionally, Walmart's definition of free cash flow is limited, in that it does not represent residual cash flows available for discretionary expenditures, due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, we believe it is important to view free cash flow as a measure that provides supplemental information to our Consolidated Statements of Cash Flows.

Although other companies report their free cash flow, numerous methods may exist for calculating a company's free cash flow. As a result, the method used by Walmart's management to calculate our free cash flow may differ from the methods used by other companies to calculate their free cash flow. We urge you to understand the methods used by other companies to calculate their free cash flow before comparing our free cash flow to that of such other companies.

The following table sets forth a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow, as well as information regarding net cash used in investing activities and net cash used in financing activities.

|  | Six Months Ended<br>July 31, |         |    |         |  |  |  |  |

| Net cash provided by operating activities          | \$                           | 10,102  | \$ | 11,900  |  |  |  |  |
| Payments for property and equipment                |                              | (5,044) |    | (5,113) |  |  |  |  |
| Free cash flow                                     | \$                           | 5,058   | \$ | 6,787   |  |  |  |  |
|  |                              |         |    |         |  |  |  |  |
| Net cash used in investing activities <sup>1</sup> | \$                           | (4,602) | \$ | (4,340) |  |  |  |  |
| Net cash used in financing activities              | \$                           | (8,774) | \$ | (8,755) |  |  |  |  |

<sup>1</sup> "Net cash used in investing activities" includes payments for property and equipment, which is also included in our computation of free cash flow.

#### **Constant Currency**

In discussing our operating results, the term currency exchange rates refers to the currency exchange rates we use to convert the operating results for all countries where the functional currency is not the U.S. dollar. We calculate the effect of changes in currency exchange rates as the difference between current period activity translated using the current period's currency exchange rates, and the comparable prior year period's currency exchange rates. Throughout our discussion, we refer to the results of this calculation as the impact of currency exchange rate fluctuations. When we refer to constant currency operating results, this means operating results without the impact of the currency exchange rate fluctuations and without the impact of acquisitions, if any, until the acquisitions are included in both comparable periods. The disclosure of constant currency amounts or results permits investors to understand better Walmart's underlying performance without the effects of currency exchange rate fluctuations or acquisitions.

The table below reflects the calculation of constant currency for total revenues, net sales and operating income for the three and six months ended ended Jul. 31, 2015.

<sup>1</sup> Excludes currency exchange rate fluctuations related to acquisitions until the acquisitions are included in both comparable periods.

#### **Comparable Sales Measures and Sam's Club Measures**

The following financial measures presented in the press release to which this reconciliation is attached are non-GAAP financial measures as defined by the SEC's rules:

- the comparable club sales of the company's Sam's Club operating segment (Sam's Club) for the 13-week period ended Jul. 31, 2015 and Aug. 1, 2014, the projected comparable club sales of Sam's Club for the 13 weeks ending Oct. 30, 2015 and the comparable club sales of Sam's Club for the 13 weeks ended Oct. 31, 2014, in each case calculated by excluding Sam's Club's fuel sales for such periods (the "Sam's Club Comparable Sales Measures");
- the percentage decrease in the net sales of Sam's Club for the three months ended Jul. 31, 2015 over the net sales of Sam's Club for the three months ended Jul. 31, 2014 in each case calculated by excluding Sam's Club's fuel sales for the relevant period; and
- the percentage decrease in the segment operating income of Sam's Club for the three months ended Jul. 31, 2015 over the segment operating income of Sam's Club for the three months ended Jul. 31, 2014, in each case calculated by excluding Sam's Club's fuel sales for the relevant period (collectively with the financial measures described in the immediately preceding bullet point, the "Sam's Club Measures").

We believe the Sam's Club comparable club sales for the historical periods for which the corresponding Sam's Club Comparable Sales Measures are presented calculated by including fuel sales are the financial measures computed in accordance with GAAP most directly comparable to the respective Sam's Club Comparable Sales Measures. We believe Sam's Club's projected comparable club sales for the 13-week period ending Oct. 31, 2015 calculated by including fuel sales is the financial measure computed in accordance with GAAP most directly comparable to the projected comparable club sales of Sam's Club for the 13-week period ending Oct. 31, 2015 calculated by excluding fuel sales. We believe the reported Sam's Club's net sales, percentage increase in net sales, segment operating income and percentage increase in segment operating income for the periods for which the corresponding Sam's Club Measures are presented are the most directly comparable financial measures.

We believe that the presentation of the Sam's Club Comparable Sales Measures and the Sam's Club Measures provides useful information to investors regarding the company's financial condition and results of operations because that information permits investors to understand the effect of the fuel sales of Sam's Club, which are affected by the volatility of fuel prices, on Sam's Club's comparable club sales and on Sam's Club's net sales and operating income for the periods presented.
