WALMART INC.

By: /s/ M. Brett Biggs

Name: M. Brett Biggs

Title: Executive Vice President and  
Chief Financial Officer

**Walmart U.S. Q2 comp sales<sup>1</sup> grew 5.2%; 14.5% two-year stack; Comp transactions strong at 6.1%**

**Q2 FY22 GAAP EPS of \$1.52; Adjusted EPS<sup>2,5</sup> of \$1.78**

**Company raises outlook for second consecutive quarter**

**Expecting FY22 Walmart U.S. comp sales of 5% to 6% and Global eCommerce sales of \$75 billion**

- \* Total revenue was \$141.0 billion, up 2.4%, negatively affected by approximately \$8.9 billion related to divestitures. Excluding currency<sup>2</sup>, total revenue would have increased 0.6% to \$138.6 billion.
- \* Walmart U.S. grew market share in grocery. Comp transactions were strong at 6.1%, led by stores.
- \* Walmart U.S. operating income increased 20.4%. Adjusted operating income<sup>2</sup> increased 12.0%.
- \* Walmart U.S. eCommerce sales grew 6% and 103% on a two-year stack.
- \* Strong growth in advertising businesses globally, including nearly doubling sales in Walmart U.S. versus last year.
- \* Sam's Club comp sales<sup>1</sup> increased 7.7%, and eCommerce sales grew 27%. Membership income increased 12.2% with member count reaching an all-time high.
- \* Walmart International net sales were \$23.0 billion, a decrease of \$4.1 billion, or 15.2%, negatively affected by \$8.9 billion related to divestitures. Changes in currency exchange rates positively affected net sales by approximately \$2.4 billion.
- \* Consolidated gross profit rate decreased 15 basis points; Walmart U.S. increased 20 basis points. Consolidated operating expenses as a percentage of net sales declined 81 basis points; adjusted<sup>3</sup> declined 47 basis points.
- \* Consolidated operating income was \$7.4 billion, an increase of 21.4%, with strength across the company. Consolidated operating income as a percentage of net sales increased 83 basis points; adjusted<sup>4</sup> increased 50 basis points.
- \* Repurchased \$5.2 billion in shares year to date, representing around 25% of the \$20 billion authorization announced earlier this year.

"We had another strong quarter in every part of our business. Our global eCommerce sales are on track to reach \$75 billion by the end of the year, further strengthening our position as a leader in omnichannel. We grew market share in U.S. grocery, added thousands of new sellers to our marketplace, rapidly grew advertising businesses around the world, and we're finding innovative ways to commercialize our data and build technology. We have a unique ecosystem of products and services designed to serve customers in broader, deeper ways, and we're grateful to our associates for making it all happen."

Doug McMillon  
President and CEO, Walmart

## Fiscal 2022 Q3 and full-year guidance

The following guidance reflects the company's updated expectations for Q3 and fiscal year 2022 and is provided on a non-GAAP basis as the company cannot predict certain elements which are included in reported GAAP results, including the impact of foreign exchange translation and externally adjusted items. Prior year results are on an adjusted basis. The company's updated guidance assumes continued strength in the U.S. economy and no significant additional government stimulus for the remainder of the year.

## Forward-Looking Statements

This release and related management commentary contains statements or may include or may incorporate by reference, statements that may be deemed to be "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the

"Act"), that are intended to enjoy the protection of the safe harbor for forward-looking statements provided by the Act as well as protections afforded by other federal securities laws. Assumptions on which such forward-looking statements are based are also forward-looking statements. Such forward-looking statements are not statements of historical facts, but instead express our estimates or expectations for our consolidated, or one of our segment's or business', economic performance or results of operations for future periods or as of future dates or events or developments that may occur in the future or discuss our plans, objectives or goals. Our actual results may differ materially from those expressed in or implied by any of these forward-looking statements as a result of changes in circumstances, assumptions not being realized or other risks, uncertainties and factors including: the impact of the COVID-19 pandemic on our business and the global economy; economic, capital markets and business conditions; trends and events around the world and in the markets in which we operate; currency exchange rate fluctuations, changes in market interest rates and market levels of wages; changes in the size of various markets, including eCommerce markets; unemployment levels; inflation or deflation, generally and in particular product categories; consumer confidence, disposable income, credit availability, spending levels, shopping patterns, debt levels and demand for certain merchandise; the effectiveness of the implementation and operation of our strategies, plans, programs and initiatives; unexpected changes in our objectives and plans; the impact of acquisitions, investments, divestitures, and other strategic decisions; our ability to successfully integrate acquired businesses; changes in the trading prices of certain equity investments we hold; initiatives of competitors, competitors' entry into and expansion in our markets, and competitive pressures; customer traffic and average transactions in our stores and clubs and on our eCommerce websites; the mix of merchandise we sell, the cost of goods we sell and the shrinkage we experience; our gross profit margins; the financial performance of Walmart and each of its segments, including the amounts of our cash flow during various periods; the amount of our net sales and operating expenses denominated in the U.S. dollar and various foreign currencies; commodity prices and the price of gasoline and diesel fuel; supply chain disruptions and disruptions in seasonal buying patterns; the availability of goods from suppliers and the cost of goods acquired from suppliers; our ability to respond to changing trends in consumer shopping habits; consumer acceptance of and response to our stores, clubs, eCommerce platforms, programs, merchandise offerings and delivery methods; cyber security events affecting us and related costs and impact to the business; developments in, outcomes of, and costs incurred in legal or regulatory proceedings to which we are a party or are subject, and the liabilities, obligations and expenses, if any, that we may incur in connection therewith; casualty and accident-related costs and insurance costs; the turnover in our workforce and labor costs, including healthcare and other benefit costs; our effective tax rate and the factors affecting our effective tax rate, including assessments of certain tax contingencies, valuation allowances, changes in law, administrative audit outcomes, impact of discrete items and the mix of earnings between the U.S. and Walmart's international operations; changes in existing tax, labor and other laws and regulations and changes in tax rates including the enactment of laws and the adoption and interpretation of administrative rules and regulations; the imposition of new taxes on imports, new tariffs and changes in existing tariff rates; the imposition of new trade restrictions and changes in existing trade restrictions; adoption or creation of new, and modification of existing, governmental policies, programs, initiatives and actions in the markets in which Walmart operates and elsewhere and actions with respect to such policies, programs and initiatives; changes in accounting estimates or judgments; the level of public assistance payments; natural disasters, changes in climate, geopolitical events, global health epidemics or pandemics and catastrophic events; and changes in generally accepted accounting principles in the United States.

Our most recent annual report on Form 10-K and subsequent quarterly report on Form 10-Q filed with the SEC discuss other risks and factors that could cause actual results to differ materially from those expressed or implied by any forward-looking statement in the release and related management commentary. We urge you to consider all of the risks, uncertainties and factors identified above or discussed in such reports carefully in evaluating the forward-looking statements in this release. Walmart cannot assure you that the results reflected in or implied by any forward-looking statement will be realized or, even if substantially realized, that those results will have the forecasted or expected consequences and effects for or on our operations or financial performance. The forward-looking statements made today are as of the date of this release. Walmart undertakes no obligation to update these forward-looking statements to reflect subsequent events or circumstances.

Comparable sales is a metric that indicates the performance of our existing stores and clubs and it is important to review in conjunction with the company's financial results reported in accordance with GAAP. Comparable sales excluding fuel is also an important, separate metric that indicates the performance of our existing stores and clubs without considering fuel, which is volatile and unpredictable. Other companies in our industry may calculate comparable sales differently, limiting the comparability of the metric.

**(Unaudited)**

The following information provides reconciliations of certain non-GAAP financial measures presented in the press release to which this reconciliation is attached to the most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles (GAAP). The company has provided the non-GAAP financial information presented in the press release, which is not calculated or presented in accordance with GAAP, as information supplemental and in addition to the financial measures presented in the press release that are calculated and presented in accordance with GAAP. Such non-GAAP financial measures should not be considered superior to, as a substitute for or alternative to, and should be considered in conjunction with, the GAAP financial measures presented in the press release. The non-GAAP financial measures in the press release may differ from similar measures used by other companies.

**Constant Currency**

In discussing our operating results, the term currency exchange rates refers to the currency exchange rates we use to convert the operating results for countries where the functional currency is not the U.S. dollar into U.S. dollars. We calculate the effect of changes in currency exchange rates as the difference between current period activity translated using the current period's currency exchange rates and the comparable prior year period's currency exchange rates. Additionally, no currency exchange rate fluctuations are calculated for non-USD acquisitions until owned for 12 months.

Throughout our discussion, we refer to the results of this calculation as the impact of currency exchange rate fluctuations. When we refer to constant currency operating results, this means operating results without the impact of the currency exchange rate fluctuations. The disclosure of constant currency amounts or results permits investors to better understand Walmart's underlying performance without the effects of currency exchange rate fluctuations.

The table below reflects the calculation of constant currency for total revenues, net sales and operating income for the three and six months ended July 31, 2021.

### Adjusted operating income

Adjusted operating income is considered a non-GAAP financial measure under the SEC's rules because it excludes certain charges included in operating income calculated in accordance with GAAP. Management believes that adjusted operating income is a meaningful measure to share with investors because it best allows comparison of the performance with that of the comparable period. In addition, adjusted operating income affords investors a view of what management considers Walmart's core earnings performance and the ability to make a more informed assessment of such core earnings performance as compared with that of the prior year.

When we refer to adjusted operating income in constant currency this means adjusted operating results without the impact of the currency exchange rate fluctuations. The disclosure of constant currency amounts or results permits investors to better understand Walmart's underlying performance without the effects of currency exchange rate fluctuations. The tables below reflect the calculation of adjusted operating income and adjusted operating income in constant currency for the three and six months ended July 31, 2021.

## Free Cash Flow

We define free cash flow as net cash provided by operating activities in a period minus payments for property and equipment made in that period. We had net cash provided by operating activities of \$12.4 billion for the six months ended July 31, 2021, which decreased when compared to \$19.0 billion for the six months ended July 31, 2020 primarily due to an increase in inventory purchases due in part to lapping the impact of accelerated inventory sell-through in the first half of fiscal 2021. We generated free cash flow of \$7.4 billion for the six months ended July 31, 2021, which decreased when compared to \$15.4 billion for the six months ended July 31, 2020 due to the same reasons as the decrease in net cash provided by operating activities, as well as \$1.5 billion in increased capital expenditures.

Free cash flow is considered a non-GAAP financial measure. Management believes, however, that free cash flow, which measures our ability to generate additional cash from our business operations, is an important financial measure for use in evaluating the company's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity.

Additionally, Walmart's definition of free cash flow is limited, in that it does not represent residual cash flows available for discretionary expenditures, due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, we believe it is important to view free cash flow as a measure that provides supplemental information to our Consolidated Statements of Cash Flows.

Although other companies report their free cash flow, numerous methods may exist for calculating a company's free cash flow. As a result, the method used by Walmart's management to calculate our free cash flow may differ from the methods used by other companies to calculate their free cash flow.

The following table sets forth a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow, as well as information regarding net cash used in investing activities and net cash used in financing activities.

	Six Months Ended July 31,

Net cash provided by (used in) investing activities <sup>1</sup>	\$ 2,402	\$ (3,634)
Net cash used in financing activities	(11,559)	(7,814)

<sup>1</sup> "Net cash provided by (used in) investing activities" includes payments for property and equipment, which is also included in our computation of free cash flow.

**Adjusted EPS**

Adjusted diluted earnings per share attributable to Walmart (Adjusted EPS) is considered a non-GAAP financial measure under the SEC's rules because it excludes certain amounts included in the diluted earnings per share attributable to Walmart calculated in accordance with GAAP (EPS), the most directly comparable financial measure calculated in accordance with GAAP. Management believes that Adjusted EPS is a meaningful measure to share with investors because it best allows comparison of the performance with that of the comparable period. In addition, Adjusted EPS affords investors a view of what management considers Walmart's core earnings performance and the ability to make a more informed assessment of such core earnings performance with that of the prior year.

We adjust for the unrealized and realized gains and losses on our equity investments each quarter because although the investments are strategic decisions for the company's retail operations, management's measurement of each strategy is primarily focused on the operational results rather than the fair value of such investments. Additionally, management does not forecast changes in the fair value of its equity investments. Accordingly, management adjusts EPS each quarter for the realized and unrealized gains and losses related to those equity investments.

We have calculated Adjusted EPS for the three and six months ended July 31, 2021 by adjusting EPS for the following:

1. unrealized and realized gains and losses on the company's equity investments; and
2. the incremental loss on sale of our operations in the U.K and Japan recorded during the first quarter of fiscal 2022.

As previously disclosed in our second quarter ended July 31, 2020 press release, we have calculated Adjusted EPS for the three and six months ended July 31, 2020 by adjusting EPS for the following: (1) unrealized gains and losses on the Company's equity investments; (2) a business restructuring charge resulting from changes to corporate support teams to better support the Walmart U.S. omnichannel strategy; and (3) a discrete tax item.

# Safe harbor and non-GAAP measures

This presentation contains statements or may include or may incorporate by reference, statements that may be deemed to be "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Act"), that are intended to enjoy the protection of the safe harbor for forward-looking statements provided by the Act as well as protections afforded by other federal securities laws. Assumptions on which such forward-looking statements are based are also forward-looking statements. Such forward-looking statements are not statements of historical facts, but instead express our estimates or expectations for our consolidated, or one of our segment's or business', economic performance or results of operations for future periods or as of future dates or events or developments that may occur in the future or discuss our plans, objectives or goals. Our actual results may differ materially from those expressed in or implied by any of these forward-looking statements as a result of changes in circumstances, assumptions not being realized or other risks, uncertainties and factors including: the impact of the COVID-19 pandemic on our business and the global economy; economic, capital markets and business conditions; trends and events around the world and in the markets in which we operate; currency exchange rate fluctuations, changes in market interest rates and market levels of wages; changes in the size of various markets, including eCommerce markets; unemployment levels; inflation or deflation, generally and in particular product categories; consumer confidence, disposable income, credit availability, spending levels, shopping patterns, debt levels and demand for certain merchandise; the effectiveness of the implementation and operation of our strategies, plans, programs and initiatives; unexpected changes in our objectives and plans; the impact of acquisitions, investments, divestitures, and other strategic decisions; our ability to successfully integrate acquired businesses; changes in the trading prices of certain equity investments we hold; initiatives of competitors, competitors' entry into and expansion in our markets, and competitive pressures; customer traffic and average transactions in our stores and clubs and on our eCommerce websites; the mix of merchandise we sell, the cost of goods we sell and the shrinkage we experience; our gross profit margins; the financial performance of Walmart and each of its segments, including the amounts of our cash flow during various periods; the amount of our net sales and operating expenses denominated in the U.S. dollar and various foreign currencies; commodity prices and the price of gasoline and diesel fuel; supply chain disruptions and disruptions in seasonal buying patterns; the availability of goods from suppliers and the cost of goods acquired from suppliers; our ability to respond to changing trends in consumer shopping habits; consumer acceptance of and response to our stores, clubs, eCommerce platforms, programs, merchandise offerings and delivery methods; cyber security events affecting us and related costs and impact to the business; developments in, outcomes of, and costs incurred in legal or regulatory proceedings to which we are a party or are subject, and the liabilities, obligations and expenses, if any, that we may incur in connection therewith; casualty and accident-related costs and insurance costs; the turnover in our workforce and labor costs, including healthcare and other benefit costs; our effective tax rate and the factors affecting our effective tax rate, including assessments of certain tax contingencies, valuation allowances, changes in law, administrative audit outcomes, impact of discrete items and the mix of earnings between the U.S. and Walmart's international operations; changes in existing tax, labor and other laws and regulations and changes in tax rates including the enactment of laws and the adoption and interpretation of administrative rules and regulations; the imposition of new taxes on imports, new tariffs and changes in existing tariff rates; the imposition of new trade restrictions and changes in existing trade restrictions; adoption or creation of new, and modification of existing, governmental policies, programs, initiatives and actions in the markets in which Walmart operates and elsewhere and actions with respect to such policies, programs and initiatives; changes in accounting estimates or judgments; the level of public assistance payments; natural disasters, changes in climate, geopolitical events, global health epidemics or pandemics and catastrophic events; and changes in generally accepted accounting principles in the United States.

Our most recent annual report on Form 10-K and subsequent quarterly report on Form 10-Q filed with the SEC discuss other risks and factors that could cause actual results to differ materially from those expressed or implied by any forward-looking statement in the presentation. We urge you to consider all of the risks, uncertainties and factors identified above or discussed in such reports carefully in evaluating the forward-looking statements in this presentation. Walmart cannot assure you that the results reflected in or implied by any forward-looking statement will be realized or, even if substantially realized, that those results will have the forecasted or expected consequences and effects for or on our operations or financial performance. The forward-looking statements made today are as of the date of this presentation. Walmart undertakes no obligation to update these forward-looking statements to reflect subsequent events or circumstances.

This presentation includes certain non-GAAP measures as defined under SEC rules, including net sales, revenue, and operating income on a constant currency basis, adjusted operating income, adjusted operating income in constant currency, adjusted EPS, free cash flow and return on investment. Refer to information about the non-GAAP measures contained in this presentation. Additional information as required by Regulation G and Item 10(e) of Regulation S-K regarding non-GAAP measures can be found in our most recent Form 10-K and our Form 8-K furnished as of the date of this presentation with the SEC, which are available at [www.stock.walmart.com](http://www.stock.walmart.com).

# Fiscal 2022 Q3 and full-year guidance

The following guidance reflects the company's updated expectations for Q3 and fiscal year 2022 and is provided on a non-GAAP basis as the company cannot predict certain elements which are included in reported GAAP results, including the impact of foreign exchange translation and externally adjusted items. Prior year results are on an adjusted basis. The company's updated guidance assumes continued strength in the U.S. economy and no significant additional government stimulus for the remainder of the year.

## Non-GAAP measures - ROI

We include Return on Assets ("ROA"), which is calculated in accordance with U.S. generally accepted accounting principles ("GAAP") as well as Return on Investment ("ROI") as measures to assess returns on assets. Management believes ROI is a meaningful measure to share with investors because it helps investors assess how effectively Walmart is deploying its assets. Trends in ROI can fluctuate over time as management balances long-term strategic initiatives with possible short-term impacts. We consider ROA to be the financial measure computed in accordance with GAAP that is the most directly comparable financial measure to our calculation of ROI.

ROA was 4.4 percent and 7.7 percent for the trailing 12 months ended July 31, 2021 and 2020, respectively. The decrease in ROA was primarily due to the losses on divestiture of our operations in the U.K., Japan and Argentina as well as net fair value changes in our equity instruments, partially offset by the increase in operating income. ROI was 14.8 percent and 13.5 percent for the trailing twelve months ended July 31, 2021 and 2020. The increase in ROI was primarily due to the increase in operating income.

We define ROI as adjusted operating income (operating income plus interest income, depreciation and amortization, and rent expense) for the trailing twelve months divided by average invested capital during that period. We consider average invested capital to be the average of our beginning and ending total assets, plus average accumulated depreciation and average amortization, less average accounts payable and average accrued liabilities for that period.

Our calculation of ROI is considered a non-GAAP financial measure because we calculate ROI using financial measures that exclude and include amounts that are included and excluded in the most directly comparable GAAP financial measure. For example, we exclude the impact of depreciation and amortization from our reported operating income in calculating the numerator of our calculation of ROI. As mentioned above, we consider ROA to be the financial measure computed in accordance with generally accepted accounting principles most directly comparable to our calculation of ROI. ROI differs from ROA (which is consolidated net income for the period divided by average total assets for the period) because ROI: adjusts operating income to exclude certain expense items and adds interest income; adjusts total assets for the impact of accumulated depreciation and amortization, accounts payable and accrued liabilities to arrive at total invested capital. Because of the adjustments mentioned above, we believe ROI more accurately measures how we are deploying our key assets and is more meaningful to investors than ROA. Although ROI is a standard financial measure, numerous methods exist for calculating a company's ROI. As a result, the method used by management to calculate our ROI may differ from the methods used by other companies to calculate their ROI.

## Non-GAAP measures - ROI (cont.)

The calculation of ROA and ROI, along with a reconciliation of ROI to the calculation of ROA, is as follows:

## Non-GAAP measures - free cash flow

We define free cash flow as net cash provided by operating activities in a period minus payments for property and equipment made in that period. We had net cash provided by operating activities of \$12.4 billion for the six months ended July 31, 2021, which decreased when compared to \$19.0 billion for the six months ended July 31, 2020 primarily due to an increase in inventory purchases due in part to lapping the impact of accelerated inventory sell-through in the first half of fiscal 2021. We generated free cash flow of \$7.4 billion for the six months ended July 31, 2021, which decreased when compared to \$15.4 billion for the six months ended July 31, 2020 due to the same reasons as the decrease in net cash provided by operating activities, as well as \$1.5 billion in increased capital expenditures.

Free cash flow is considered a non-GAAP financial measure. Management believes, however, that free cash flow, which measures our ability to generate additional cash from our business operations, is an important financial measure for use in evaluating the company's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity. Additionally, Walmart's definition of free cash flow is limited, in that it does not represent residual cash flows available for discretionary expenditures, due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, we believe it is important to view free cash flow as a measure that provides supplemental information to our Consolidated Statements of Cash Flows. Although other companies report their free cash flow, numerous methods may exist for calculating a company's free cash flow. As a result, the method used by Walmart's management to calculate our free cash flow may differ from the methods used by other companies to calculate their free cash flow.

The following table sets forth a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow, as well as information regarding net cash used in investing activities and net cash used in financing activities.

(Dollars in millions)	Six Months Ended July 31,	
	2021	2020
Net cash provided by operating activities	\$ 12,423	\$ 18,956
Payments for property and equipment (capital expenditures)	(5,019)	(3,569)
<b>Free cash flow</b>	<b>\$ 7,404</b>	<b>\$ 15,387</b>
Net cash provided by (used in) investing activities <sup>1</sup>	\$ 2,402	\$ (3,634)
Net cash (used in) provided by financing activities	(11,559)	(7,814)

<sup>1</sup> "Net cash provided by (used in) investing activities" includes payments for property and equipment, which is also included in our computation of free cash flow.

## Non-GAAP measures - constant currency

In discussing our operating results, the term currency exchange rates refers to the currency exchange rates we use to convert the operating results for countries where the functional currency is not the U.S. dollar into U.S. dollars. We calculate the effect of changes in currency exchange rates as the difference between current period activity translated using the current period's currency exchange rates and the comparable prior year period's currency exchange rates. Additionally, no currency exchange rate fluctuations are calculated for non-USD acquisitions until owned for 12 months. Throughout our discussion, we refer to the results of this calculation as the impact of currency exchange rate fluctuations. When we refer to constant currency operating results, this means operating results without the impact of the currency exchange rate fluctuations. The disclosure of constant currency amounts or results permits investors to better understand Walmart's underlying performance without the effects of currency exchange rate fluctuations. The table below reflects the calculation of constant currency for total revenues, net sales and operating income for the three and six months ended July 31, 2021.

<sup>2</sup> Walmart International eCommerce net sales were \$4.1 billion and \$8.4 billion for the three and six months ended July 31, 2021, and were positively impacted by \$258 million and \$375 million of currency exchange rate fluctuations, respectively. Walmart International eCommerce net sales were \$3.3 billion and \$6.2 billion for the three and six months ended July 31, 2020, respectively.

<sup>3</sup> Walmart International eCommerce net sales increased 26% on a reported basis and 16% in constant currency and increased 37% on a reported basis and 30% in constant currency for the three and six months ending July 31, 2021, respectively.

## Non-GAAP measures - adjusted operating income

Adjusted operating income is considered a non-GAAP financial measure under the SEC's rules because it excludes certain charges included in operating income calculated in accordance with GAAP. Management believes that adjusted operating income is a meaningful measure to share with investors because it best allows comparison of the performance with that of the comparable period. In addition, adjusted operating income affords investors a view of what management considers Walmart's core earnings performance and the ability to make a more informed assessment of such core earnings performance as compared with that of the prior year.

When we refer to adjusted operating income in constant currency this means adjusted operating results without the impact of the currency exchange rate fluctuations. The disclosure of constant currency amounts or results permits investors to better understand Walmart's underlying performance without the effects of currency exchange rate fluctuations. The tables below reflect the calculation of adjusted operating income and adjusted operating income in constant currency for the three and six months ended July 31, 2021 and 2020.

## Non-GAAP measures - adjusted EPS

Adjusted diluted earnings per share attributable to Walmart (Adjusted EPS) is considered a non-GAAP financial measure under the SEC's rules because it excludes certain amounts included in the diluted earnings per share attributable to Walmart calculated in accordance with GAAP (EPS), the most directly comparable financial measure calculated in accordance with GAAP. Management believes that Adjusted EPS is a meaningful measure to share with investors because it best allows comparison of the performance with that of the comparable period. In addition, Adjusted EPS affords investors a view of what management considers Walmart's core earnings performance and the ability to make a more informed assessment of such core earnings performance with that of the prior year.

We adjust for the unrealized and realized gains and losses on our equity investments each quarter because although the investments are strategic decisions for the company's retail operations, management's measurement of each strategy is primarily focused on the operational results rather than the fair value of such investments. Additionally, management does not forecast changes in the fair value of its equity investments. Accordingly, management adjusts EPS each quarter for the realized and unrealized gains and losses related to those equity investments.

We have calculated Adjusted EPS for the three and six months ended July 31, 2021 by adjusting EPS for the following:

1. unrealized and realized gains and losses on the company's equity investments; and
2. the incremental loss on sale of our operations in the U.K and Japan recorded during the first quarter of fiscal 2022.
